TRANSCERVICAL ASPIRATION INSTRUMENT

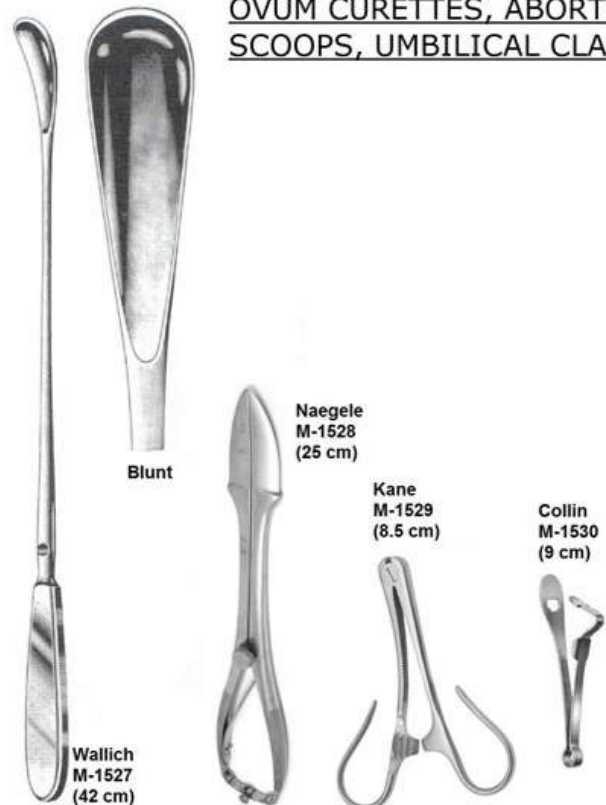

Advantages

- Optimal visibility with Ultrasound.
- Low insertion force due to beakhead end.
- Even when strongly flexed the obturator is extremely easy to remove.
- After removal of the obturator, the catheter is still easy to manipulate in all directions.
- The placental area is easily accessible due to softness of the catheter even in case of an unfavourable position of the uterus.
- Cost is minimal due to durability & reusability.
